INDEPENDENCE

# OPPORTUNITIES AVAILABLE APPLY NOW

The ACCnet21 Student Vocational Placement Program fulfils a core curriculum requirement for courses in the disability and support care sector by providing an opportunity for students to undertake placement in an authentic workplace setting, to help develop the skills, knowledge and work ethics that employers seek.

The goal of the program is to benefit students, industry providers and people living with disability by providing meaningful work experience that empowers each student to further develop their education, learning and understanding – whilst providing a positive impact within the Australian community.

## Our program offers students a range of exciting benefits including:

- Valuable, practical and real-world industry experience;
- Coaching and mentoring opportunities;
- Ability to work alongside people who are passionate about the industry;
- Network-building prospects;
- Improved training and education opportunities; and
- The creation of possible future employment opportunities to help you reach your career goals sooner.

Each student is assigned to an experienced and qualified staff member that will act as a mentor and advisor during their vocational placement. Our mentors work closely with our students to ensure their learning objectives are met through relevant workplace training and on the job experiences.

Students must agree to work within the core values of ACCnet21 which include being compassionate, working with integrity and be committed to ensuring people with a disability have greater independence. We support and respect our client's individuality by offering experienced, knowledgeable advice to identify the best service for their needs, goals and personal aspirations.
